

## Regulatory Indicators for Sustainable Energy (RISE) 2017 Country Data - Haiti

### Clean Cooking

Indicator	Score
Planning	11
Scope of planning	50
Standards and Labeling	0
Incentives and attributes	50
<b>Total</b>	<b>27.75</b>

### Electricity Access

Indicator	Score
Existence and monitoring of officially approved electrification plan	0
Scope of officially approved electrification plan	0
Framework for grid electrification	33
Framework for minigrids	53
Framework for stand-alone systems	67
Consumer affordability of electricity	100
Utility Transparency and Monitoring	25
Utility Creditworthiness	0
<b>Total</b>	<b>34.75</b>

### Energy Efficiency

Indicator	Score
National energy efficiency planning	13
Energy efficiency entities	29
Information provided to consumers about electricity usage	56
EE incentives from electricity rate structures	57

## Regulatory Indicators for Sustainable Energy (RISE)

Incentives & mandates: Industrial and Commercial End users	0
Incentives & mandates: public sector	0
Incentives & mandates: utilities	0
Financing mechanisms for energy efficiency	25
Minimum energy efficiency performance standards	0
Energy labeling systems	0
Building energy codes	0
Transport	0
Carbon Pricing and Monitoring	0
<b>Total</b>	<b>13.85</b>

## Renewable Energy

Indicator	Score
Legal framework for renewable energy	50
Planning for renewable energy expansion	20
Incentives and regulatory support for renewable energy	6
Attributes of financial and regulatory incentives	0
Network connection and use	13
Counterparty risk	8
Carbon Pricing and Monitoring	0
<b>Total</b>	<b>13.86</b>

<b>Overall Score</b>	<b>22.55</b>
----------------------	--------------

## Clean Cooking

Planning	Score
Does the government track household level data on cooking solutions?	No

## Regulatory Indicators for Sustainable Energy (RISE)

Is the data publicly available?	No
Is the data gender disaggregated?	No
Is there a national or regional plan to scale up access to clean cooking solutions, or is access to clean cooking solutions covered as a part of any other government plan (regardless of the sector)?	No
If not, is there a draft plan that has been prepared but not yet been approved?	
If yes, when was the latest national plan officially approved?	
Has the plan gone through public consultation?	No
Have consultations taken the gender of participants into account?	No
Are there agencies dedicated to the following functions?	-
Setting clean cooking strategy/action plan	Yes
Setting, monitoring and enforcing standards for clean cooking solutions	No
Tracking access and adoption of clean cooking solutions	No

Scope of planning	Score	50
Does the plan take into account geographical and demographical considerations to prioritize the most vulnerable consumers?	No	
Does the plan include considerations and action items for involving women throughout the supply chain of clean cooking solutions?	Yes	
Is there a targeted awareness raising strategy to drive adoption of clean cooking solutions, such as any of the following	-	

## Regulatory Indicators for Sustainable Energy (RISE)

<p>Training programs for new stove technologies</p>	<p>Yes. A training program was developed and executed under the project Haiti Improved Cooking Technology Program (ICTP) for LPG cooking stoves (see Document 1, citation 1). Also the Global Alliance for Clean Cookstoves (GACC) action plan includes a component to develop personalized technical training programs (see Document 2, citation 1). This affirmative answer was confirmed by Interviewee 1 Mr. Dehoux. See further details under Supporting evidence source and citation below.</p>
<p>Cooking competitions with stove technologies</p>	<p>No. The ICTP program did not include cooking competitions (see Document 1, citation 2) and the GACC does not contemplate such awareness raising strategy (see Document 2, citation 2). This negative answer was confirmed by Interviewee 1 Mr. Dehoux and Interviewee 2 Mr. Adair. See further details under Supporting evidence source and citation below.</p>
<p>Nationally-sponsored educational campaigns for new stove technologies</p>	<p>Yes. Nationally-sponsored educational campaigns for new stove technologies have been conducted as part of the ICTP program (see Document 1 citation 3</p>

## Regulatory Indicators for Sustainable Energy (RISE)

	<p>and document 2 citation 3) and are part of the GACC strategy (see Document 2 citation 4). This affirmative answer was confirmed by Interviewee 1 Mr. Dehoux. See further details under Supporting evidence source and citation below.</p>
<p>Private sector advertising campaigns for new stove technologies</p>	<p>Yes. A campaign was conducted under the project ICTP program for improved charcoal cooking stoves (see Document 1 citation 3). The GACC strategy also includes a communication campaign to stimulate both the offer and the demand for improved cookstoves across different communication channels which, presumably, will include private sector advertising (see Document 2, citations 4 and 5). This affirmative answer was confirmed by Interviewee 1 Mr. Dehoux and Interviewee 2 Mr. Adair. See further details under Supporting evidence source and citation below.</p>
<p>Partnerships with CSOs and community-based organizations</p>	<p>Yes. Partnerships with CSOs and community-based organizations (e.g. schools, orphanages, community leaders, women clubs and other focus groups) have been part of the ICTP and other programs (see Document</p>

## Regulatory Indicators for Sustainable Energy (RISE)

	<p>1 citation 4) and the GACC plan also includes the development of such partnerships (see Document 2, citation 6). This affirmative answer was confirmed by Interviewee 1 Mr. Dehoux and Interviewee 2 Mr. Adair. See further details under Supporting evidence source and citation below.</p>
Other	No. No other awareness raising strategies were mentioned by the interviewees or found through desk research.
Details of other program	
Does the awareness strategy include targeted messages to both men and women?	Yes
Is there a last mile distribution strategy <sup>3</sup> in place for cooking fuels?	No
Is there a last mile distribution strategy in place for cooking technologies?	No

Standards and Labeling	Score	0
Are there standards for the following aspects of clean cooking solutions		-
Efficiency		No
Emissions		No
Safety		No

## Regulatory Indicators for Sustainable Energy (RISE)

Have the standards been adopted from external standards or developed domestically?	NA
Is there a verification program in place for standards?	No
Does the program work with a standards testing facility or lab?	No
Does the stove testing facility or lab need to be accredited?	No
Have the standards been verified through field testing?	No
Have labeling schemes been adopted on clean cooking products for the following	-
Efficiency	No
Emissions	No

Incentives and attributes	Score	50
Are there specific financing facilities available to support suppliers/consumers to develop/purchase clean cooking solutions?		Yes
Are there specific financing or subsidy programs for clean cooking solutions targeted to low income consumers?		Yes
Are there duty exemptions, tax benefits, and/or subsidies to support clean cooking solutions?		
Are there programs for commercial entities to invest in efficient, low-emission stoves? (time stamping) Please indicate the year in which each program was first made available		No, On the availability of financing facilities for consumers: Entrepreneurs du Monde, a French NGO, has developed the 'Palmis Enègi' program to offer consumers financing facilities for the purchase of improved charcoal and LPG cookstoves (see

## Regulatory Indicators for Sustainable Energy (RISE)

Document 1, citations 1 and 2). In addition, two microfinance institutions (ID Microfinance and ACME SA) developed microfinance products ('Kredi enèji' and 'Kredi Enèji vèt') to purchase improved cookstoves (see Document 2, citation 1).  
 The Palmis Enègi program was initiated in 2012 (see Document 1, citation 1), and the Kredi Enèji and Kredi Enèji vèt programs were initiated in the 2013-2014 timeframe (an agreement having been reached with USAID as part of the Improved Cooking Technology Program in late 2012, see Document 3). All financing facilities offer credits for improved cookstoves without particular technology or fuel distinction, although parts of the initiatives were geared at developing LPG-based stoves (see Document 1, citation 1).

### Electricity Access

Existence and monitoring of officially approved electrification plan	Score	0
Is there an officially approved national electrification plan?		No
Are the electrification plan and the updates publicly available?		No
Is there a requirement for periodic progress reports tracking progress towards the defined energy access target?		No

## Regulatory Indicators for Sustainable Energy (RISE)

Does the reporting actually take place?	No
Are there institution(s) responsible for carrying out the following functions	-
Setting electrification strategy	No
Setting electrification milestones and deadlines	No
Coordinating generation, transmission, and distribution plans and their implementation	No
Reporting progress towards the defined energy access target/milestones with periodic reports	No
Is the electrification plan developed based on demand assessment?	No
Were there any public consultations while developing the plan?	No
Is there a provision for the plan periodic evaluations?	No

Scope of officially approved electrification plan	Score	0
Does the plan target a service level (e.g., power availability, number of guaranteed hours of power supply, etc.)?		No
Does the electrification plan include off-grid solutions (either/or both minigrids and standalone systems)?		No
Does the plan include productive uses (e.g. agricultural, commercial, and industrial activities)?		No
Does the plan include community facilities (e.g. health centers, schools, administrative buildings)?		No
Does the plan include areas with informally settled people/groups?		No

## Regulatory Indicators for Sustainable Energy (RISE)

Does the plan specifically address the electricity access of female-headed households?	No
Does the plan set up a specific target on female-headed households' electrification?	No
Are there geospatial maps conveying the timeframe of planned grid extension?	No
Are these geospatial maps made publicly available?	No

<b>Framework for grid electrification</b>	<b>Score</b>	<b>33</b>
Does the government have a dedicated funding line or budget for electrification (e.g., funded national program, budget item, rural electrification fund to finance grid extension)?	Yes	
Are there capital subsidies paid to the utilities to provide distribution systems to rural areas/villages?	Yes	
Are there consumer financing mechanisms (i.e. utility loans, on bill financing, micro-loans etc.) and/or direct subsidies available to support the payment of connection fees by consumers?	No	
Are there consumer financing mechanisms targeting specifically female headed households?	No	
Are there consumer financing mechanisms targeting low-income households?	No	
Does the government specify standards of performance on reliability (e.g. number of guaranteed hours per day, duration of the electricity, frequency of outages, SAIDI, SAIFI etc.)?	No	
Is there a periodic reporting system in place to ensure standards compliance?	No	

<b>Framework for minigrids</b>	<b>Score</b>	<b>53</b>
--------------------------------	--------------	-----------

## Regulatory Indicators for Sustainable Energy (RISE)

Are there programs which aim to develop minigrid systems or support the development of minigrids systems?	Yes
Do the regulations clarify what will occur when the interconnected grid reaches a minigrid?.	No
Are there national programs which aim to develop stand-alone systems or support the development of stand-alone systems?	Yes
Are minigrids legally allowed to operate in the country?	Yes
Can minigrids be owned and operated by private operators?	Yes
Do the regulations detail procedures for consumers to get connected to minigrids?	No
Do the regulations differ by size of minigrids?	No
Are mini-grid operators legally allowed to charge a different tariff from the national tariff?	Yes
Are there publicly funded mechanisms to secure viability gap funding for operators?	No
Are there duty exemptions and/or capital subsidies for minigrid systems and/or individual components?	Yes
Are there specific financing facilities (access to credit etc.) available to support operators?	Yes
Are there duty exemptions and/or subsidies to support standalone home systems?	Yes
Are there legal restrictions that limit the prices standalone home system retailers or service providers can charge?	No
Are there specific financing facilities available to support operators/consumers to develop/ purchase standalone home systems?	Yes
Are there technical standards detailing the requirements for minigrids to connect the grid?	No

## Regulatory Indicators for Sustainable Energy (RISE)

Are technical standards made publicly available?	No
Are there safety standards for minigrids (e.g. overcurrent protection, system control etc.)?	No
Are these safety standards made publicly available?	No
Has the government adopted international quality standards for stand-alone systems?	No
Has the government adopted international testing methods or does it accept testing done in another country?	No
Are there environmental regulations on the disposal of solar devices and standalone home system products or components?	No

<b>Framework for stand-alone systems</b>	<b>Score</b>	<b>67</b>
Are there programs which aim to develop minigrid systems or support the development of minigrids systems?	Yes	
Do the regulations clarify what will occur when the interconnected grid reaches a minigrid?.	No	
Are there national programs which aim to develop stand-alone systems or support the development of stand-alone systems?	Yes	
Are there publicly funded mechanisms to secure viability gap funding for operators?	No	
Are there duty exemptions and/or capital subsidies for minigrid systems and/or individual components?	Yes	
Are there specific financing facilities (access to credit etc.) available to support operators?	Yes	
Are there duty exemptions and/or subsidies to support standalone home systems?	Yes	

## Regulatory Indicators for Sustainable Energy (RISE)

Are there legal restrictions that limit the prices standalone home system retailers or service providers can charge?	No
Are there specific financing facilities available to support operators/consumers to develop/ purchase standalone home systems?	Yes
Are there technical standards detailing the requirements for minigrids to connect the grid?	No
Are technical standards made publicly available?	No
Are there safety standards for minigrids (e.g. overcurrent protection, system control etc.)?	No
Are these safety standards made publicly available?	No
Has the government adopted international quality standards for stand-alone systems?	No
Has the government adopted international testing methods or does it accept testing done in another country?	No
Are there environmental regulations on the disposal of solar devices and standalone home system products or components?	No

<b>Consumer affordability of electricity</b>	<b>Score</b>	<b>100</b>
What is the annual cost of subsistence consumption (30kWh/month) as a percentage of GNI per household of the bottom 20 percent income households of the population?		
How many months does it take for the consumer to pay the connection fee based on savings of the bottom 20 percent of population?		
Is there a mechanism to support low-volume consumers such as social or lifeline tariff?	Yes	

## Regulatory Indicators for Sustainable Energy (RISE)

Utility Transparency and Monitoring	Score	25
Are the financial statements of the largest utility publicly available for each of the following		-
Generation		No
Transmission		No
Distribution		No
Retail sales		No
If yes, are they audited by an independent auditor for each of the following		-
Generation		No
Transmission		No
Distribution		No
Retail sales		No
Are the following metrics published in a primary official document (by the utility, regulator or ministry and/or government)?		-
Generation - Electricity available for sale to end-users		No
Transmission - Transmission loss rate		No
Distribution - Distribution loss rate		No
Retail Sales - Bill collection rate		No
Is the utility operating an incidence/outage recording system (or SCADA/EMS with such functionality)?		Yes
Is the utility measuring the SAIDI and SAIFI or any other measurements for service reliability?		No

## Regulatory Indicators for Sustainable Energy (RISE)

Are the measurements reported to the regulatory body?	No
Are the measurements available to public?	No

<b>Utility Creditworthiness</b>	<b>Score</b>	<b>0</b>
No Data Found		

### Energy Efficiency

<b>National energy efficiency planning</b>	<b>Score</b>	<b>13</b>
Is there legislation or a national action plan that aims to increase EE?	No	
Is there an energy efficiency goal or target at the national level?	No	
Are there targets defined for any of the following sectors?	-	
Residential sector	Yes	
Commercial services sector	No	
Transport sector	No	
Industrial sector	Yes	
Power sector	No	
Are targets derived from detailed analysis that is publicly available?	No	
Is there a requirement for periodic progress reports tracking data related to the efficiency target(s)?	No	

## Regulatory Indicators for Sustainable Energy (RISE)

Energy efficiency entities	Score	29
Are there governmental and/or independent bodies that carry out formulation and implementation of EE strategy, policy and regulation for each of the roles listed below		-
Setting EE strategy		Yes
Setting EE standards		Yes
Regulating EE activities of energy suppliers		Yes
Regulating EE activities of energy consumers		No
Certifying compliance with equipment EE standards		Yes
Certifying compliance with building EE standards		No
Selecting and/or approving third party auditors tasked with certifying EE standards		No
Are energy efficiency programs developed based on market analyses with plans open to public consultation and periodic evaluation?		No
Are there professional certification/accreditation programs mandated for any of the following energy efficiency activities		-
Energy auditing/energy management		No
Energy efficiency financing		No
Monitoring and verification of energy consumption/savings		No
Building energy efficiency construction/design		No
Other		No

**Information provided to consumers about**

**Score**

**56**

## Regulatory Indicators for Sustainable Energy (RISE)

### electricity usage

Is it mandatory for the selected utility to provide the following customers with reports of their energy usage, in a bill or by other means for residential customers, commercial services customers, and industrial customers?	
Residential customers	Yes
Commercial customers	Yes
Industrial customers	Yes
At what intervals do they receive these reports (times per year)?	
Residential customers	6
Commercial customers	12
Industrial customers	12
Do the reports include the price levels customers pay for energy usage?	
Residential sector	Yes
Commercial sector	Yes
Industrial sector	Yes
Does the regulator track the utility's compliance with laws for providing energy usage information to customers?	Yes
Do customers receive a bill or report which compares them to other users in the same region and/or usage class?	-
Residential customers	No
Commercial customers	No
Industrial customers	No

## Regulatory Indicators for Sustainable Energy (RISE)

Do customers receive a bill or report that shows their energy usage compared to previous bills or reports over time?	
Residential customers	Yes
Commercial customers	Yes
Industrial customers	Yes
Does the selected utility offer customers access real time feedback on energy usage (for either prepaid or post-paid systems)?	No
Does the selected utility offer customers the ability to manage energy usage levels remotely (through apps or other technology mediums that can track real time usage)	No

<b>EE incentives from electricity rate structures</b>	<b>Score</b>	<b>57</b>
What types of electricity rate structure do the residential, commercial services, and industrial customers face?		-
Residential customers		-
Commercial customers		-
Industrial customers		-
Which of the following charges do electricity customers pay in the commercial services sector and industrial sector?		-
Commercial sector		-
Industrial sector		-
Are any of the following time-of-use (TOU) rate structures applied to the residential sector, commercial services sector, and industrial sector?		-

## Regulatory Indicators for Sustainable Energy (RISE)

Residential sector	-
Commercial sector	-
Industrial sector	

<b>Incentives &amp; mandates: Industrial and Commercial End users</b>	<b>Score</b>	<b>0</b>
Are there any of the following energy-efficiency mandates for large energy users?	-	
Targets (e.g. kWh savings or lower energy intensity or carbon dioxide reductions, etc.)	No	
Mandatory audits	No	
Progress/tracking reports	No	
Energy-management system (computer technologies to optimize energy use)	No	
Are there penalties in place for non-compliance with regulatory obligations for EE?	No	
Is there a requirement for periodic reporting of energy consumption in order to enforce and/or track progress of energy efficiency in large consumers' facilities?	No	
Is there a measurement and verification program in place?	No	
Are energy efficiency incentives in place for large-scale users?	No	
Is there an energy efficiency mandate or incentive program for SMEs?	No	
Is there a program to publicly recognize end users that have achieved significant energy savings measures?	No	

## Regulatory Indicators for Sustainable Energy (RISE)

Are energy savings and/or financial savings publicized?	No
Does the program offer assistance (from a government or independent entity) to end users to identify energy savings investments opportunities?	No

Incentives & mandates: public sector	Score	0
Are there binding energy savings obligations for public buildings and/or other public facilities (may include water supply, wastewater services, municipal solid waste, street lighting, transportation, and heat supply) ?	No	
Is there a reporting mechanism to track and enforce energy savings in public sector facilities (either in-house or by a third party)?	No	
Is there a specific policy or mandated guidelines for public procurement of energy-efficient products and services?	No	
Are procurement guidelines updated periodically to reflect technological advances and best practices in energy efficient products and services?	No	
Do public budgeting regulations and practices allow public entities to retain energy savings at the following levels?	No	

Incentives & mandates: utilities	Score	0
Generation	-	
Are utilities required to carry out energy efficiency activities in this area?	No	
Are there penalties in place for non-compliance with EE requirements?	No	
Are energy savings or other target indicators measured to track performance in meeting EE requirements?	No	

## Regulatory Indicators for Sustainable Energy (RISE)

Are the requirements measured/validated by an independent third party?	No
Transmission and distribution networks	-
Are utilities required to carry out energy efficiency activities in this area?	No
Are there penalties in place for non-compliance with EE requirements?	No
Are energy savings or other target indicators measured to track performance in meeting EE requirements?	No
Are the requirements measured/validated by an independent third party?	No
Demand-side management	-
Are utilities required to carry out energy efficiency activities in this area?	No
Are there penalties in place for non-compliance with EE requirements?	No
Are energy savings or other target indicators measured to track performance in meeting EE requirements?	No
Are the requirements measured/validated by an independent third party?	No
Are any of the following mechanisms available for utilities to recover costs associated with or revenue lost from mandated energy efficiency activities in the residential, commercial, and/or industrial sectors	-
Public budget financing	No
Compensation for revenue losses from EE activities via a tracking account	No

## Regulatory Indicators for Sustainable Energy (RISE)

Revolving funds and/or credit lines for EE activities	No
Partial risk guarantees	No
Program cost recovery	No
On-bill financing/pre-payment	No
Decoupling	No

<b>Financing mechanisms for energy efficiency</b>	<b>Score</b>	<b>25</b>
Are any of the following financing mechanisms for energy efficiency activities available in the (R) residential sector, (C) commercial services sector, and (I) industrial sector?	-	
Residential sector	-	
Tax incentives	Yes	
Discounted "green" mortgages	No	
On-bill financing	No	
Credit lines and/or revolving funds with banks for energy efficiency activities	No	
Green or energy efficiency bonds	No	
Energy services agreements (pay-for-performance contracts)	No	
Vendor credit and/or leasing for energy efficiency activities	No	
Partial risk guarantees	No	
Commercial services sector	-	
Tax incentives	Yes	

## Regulatory Indicators for Sustainable Energy (RISE)

Discounted "green" mortgages	No
On-bill financing	No
Credit lines and/or revolving funds with banks for energy efficiency activities	No
Green or energy efficiency bonds	No
Energy services agreements (pay-for-performance contracts)	No
Vendor credit and/or leasing for energy efficiency activities	No
Partial risk guarantees	No
Industrial sector	-
Tax incentives	Yes
Discounted "green" mortgages	No
On-bill financing	No
Credit lines and/or revolving funds with banks for energy efficiency activities	No
Green or energy efficiency bonds	No
Energy services agreements (pay-for-performance contracts)	No
Vendor credit and/or leasing for energy efficiency activities	No
Partial risk guarantees	No
How many financial and/or non-financial institutions offer financial products for energy efficiency investments in each sector?	-
Residential sector	-

## Regulatory Indicators for Sustainable Energy (RISE)

Commercial sector	-
Industrial sector	-

Minimum energy efficiency performance standards	Score	0
Have minimum energy performance standards been adopted for the following product categories?		-
Refrigerators		No
Heating, ventilation and/or air conditioning (HVAC)		No
Lighting equipment		No
Industrial electric motors		No
Other industrial equipment		No
Light vehicles (heavy duty transport vehicles were tracked but not included in the scoring)		No
Are there verification programs that include the following components for each product category		-
Refrigerators		-
Heating, ventilation and/or air conditioning (HVAC)		-
Lighting equipment		-
Industrial electric motors		-
Other industrial equipment		-
Light vehicles		-

## Regulatory Indicators for Sustainable Energy (RISE)

Energy labeling systems	Score	0
Have energy efficiency labeling schemes been adopted for?		-
Refrigerators		No
HVAC		No
Lighting equipment		No
Industrial electric motors		No
Other industrial equipment		No
Transport vehicles		No
Do the labeling schemes have the following components for each product category		-
Refrigerators		-
HVAC		-
Lighting equipment		-
Industrial electric motors		-
Other industrial equipment		-
Transport vehicles		-

Building energy codes	Score	0
Are there energy efficiency codes for new residential buildings?		No
Are there energy efficiency codes for new commercial buildings?		No
Are the building energy efficiency standards required to be updated on a regular basis to reflect technological advances and		-

## Regulatory Indicators for Sustainable Energy (RISE)

changes in best practices for building energy efficiency in each sector	
Residential buildings	No
Commercial buildings	No
Is commission testing for energy efficiency required for final building acceptance documentation?	No
Is there a requirement for periodic reporting to verify compliance with building energy efficiency requirements?	No
Is verification carried out by a third party?	No
Are renovated buildings required to meet a building energy code, in each sector	-
Residential sector	No
Commercial sector	No
Are the building energy efficiency standards required to be updated on a regular basis to reflect technological advances and changes in best practices for building energy efficiency in each sector	-
Residential sector	No
Commercial sector	No
Is there a mandatory standardized rating or labeling system for the energy performance of existing buildings?	No
Are commercial and residential buildings required to disclose property energy usage at the point of sale or when leased?	No
Are large commercial and residential buildings required to disclose property energy usage annually?	No
Are there mandates or targets for new building stocks to achieve high quality energy efficiency certifications, such as LEED (Leadership in Energy & Environmental Design) (e.g. percentage	No

## Regulatory Indicators for Sustainable Energy (RISE)

of new building stocks that must be LEED certified)?

Transport	Score	0
Is there a national database or national reporting system to periodically track and report the following transport efficiency metrics		-
Fuel per mile driven		No
Average distance traveled per vehicle		No
Distance traveled by public transit as a share of total passenger distance traveled		No
Vehicle miles traveled per capita		No
Other		No
Are there any mandate or incentive programs that support reduction of transport demands or shifts to more energy efficient modes of transport for personal use, such as		-
Regularly scheduled teleworking		No
Bicycle and/or other non-motorized schemes		No
Car sharing		No
Public transit subsidies for consumers		No
Congestion charges		No
Electric vehicle programs		No
Other		No
Is there a requirement for periodic reporting to verify compliance or progress of the program(s)?		

## Regulatory Indicators for Sustainable Energy (RISE)

Are there any mandate or incentive programs that support reduction of transport demands or shifts to more energy efficient modes of transport for commercial and/or industrial use, such as	-
Heavy duty vehicle fuel economy standards (data already collected in Indicator 10 can be scored here)	No
Freight rail mandatory fuel economy standards or efficiency incentives	
Energy efficiency procurement standards or incentives for municipal rail and bus fleets	No
Efficient fuel switching mandate or incentive programs for commercial/industrial vehicle fleets	No
Other	No
Is there a requirement for periodic reporting to verify compliance or progress of the program(s)?	

<b>Carbon Pricing and Monitoring</b>	<b>Score</b>	<b>0</b>
No Data Found		

## Renewable Energy

<b>Legal framework for renewable energy</b>	<b>Score</b>	<b>50</b>
Does a legal framework for renewable energy development exist?		No
Does the legal framework allow private sector ownership of renewable energy generation?		Yes

<b>Planning for renewable energy expansion</b>	<b>Score</b>	<b>20</b>
--	--------------	-----------

## Regulatory Indicators for Sustainable Energy (RISE)

Does an official renewable energy target exist?	Yes
Is the target legally binding?	No
Is the RE target linked to international commitments (eg. NDC or regional commitment)?	Yes
Is the target based on a transparent methodology?	No
Is there a renewable energy action plan or strategy to attain the target ?	No
Is there any provision for consultation with the public on the renewable plan?	No
Is there an assessment of the role of renewables in electricity supply?	Yes
Is there a target for renewables in electricity?	No
Is there an assessment of the needs for heating and cooling in buildings and industry in the country and of how renewables can contribute?	No
Is there a specific target for renewables for heating and cooling?	No
Is there an assessment of the potential role for renewables in transport including biofuels and electrification?	No
Is there a specific target for renewables in transport?	No
Does the renewable plan or strategy estimate the amount of investment necessary to meet the RE target?	No
Is there an institution responsible for tracking progress in renewable energy development?	Yes
Is there any periodic reporting mechanism for renewable energy progress?	No
Is there a mechanism for adjusting the plan based on reporting of renewable energy deployment?	No

## Regulatory Indicators for Sustainable Energy (RISE)

Is current policy environment conducive to renewable energy deployment?	No
Is generation and transmission planning integrated?	No
Is planning for dispatch included in the generation and transmission plan?	No
Is the generation plan based on a probabilistic approach?	No
Does the current transmission planning consider renewable energy scale-up?	No
Does the government endorse and use the solar/wind resource maps and data applicable to their country that are available through the Global Solar Atlas / Global Wind Atlas, or have they published some other solar/wind resource map that conforms to best practice in the last five years?	Yes
Has the country carried out geospatial planning or produced zoning guidance to inform the commercial development of the RE resource?	No
Has the geospatial planning or zoning guidance been carried out according to best practice by	No

<b>Incentives and regulatory support for renewable energy</b>	<b>Score</b>
<b>6</b>	
Does the country offer long term PPA's for renewable electricity production for large scale producers(e.g. via. feed-in-tariffs, PPA's awarded through auctions etc.)	No
Does the country offer long term PPA's for renewable electricity production for small scale producers(e.g. via. feed-in-tariffs, PPA's awarded through auctions etc.)	No
Does the government publish clear and practical guidance on what permissions are required to develop a RE electricity project?	No

## Regulatory Indicators for Sustainable Energy (RISE)

Does the government offer other direct fiscal incentives for renewable electricity (e.g. capital subsidies, grants or rebates, investment tax credits, tax reductions, production tax credits, FITs for large producers?)	Yes
Does the country provide prioritized access to the grid for RE?	No
Do RE projects receive priority in dispatch?	No
Are there provisions to compensate seller if offtake infrastructure is not built in time?	No
Are there mechanisms to compensate RE projects for lost generation due to certain curtailments after project commissioning?	No
Is the compensation due because of curtailment actually given out.	
Is there a biofuels blending mandate or other obligation to use biofuels?	No
Are there sustainability criteria which biofuels which contribute to the mandate must meet?	
If there is a plan for producing biofuels in the country, has this included an assessment of sustainability impacts (e.g. against the GBEP Sustainability indicators) including an assessment of impacts on food security.	No
Is there at least one scheme to encourage use of electric/hybrid vehicles? (e.g. Tax benefit to consumers and manufacturers, etc.)	No
Are there any policies to encourage deployment of any renewable energy heating and cooling technologies?	No
Are there specific measures (financial support or promotion) designed to encourage the use of renewables in the heating and cooling sectors?	No
Are opportunities for renewable heat promoted alongside energy efficiency measures in buildings and/or industry?	No

## Regulatory Indicators for Sustainable Energy (RISE)

Attributes of financial and regulatory incentives	Score	0
Is competition used to ensure large scale RE generation (projects >10MW) is cost competitive (e.g. through auctions for PPA's)?		No
Is there a schedule for future bids/auctions available for investors?		No
Is there a pre-qualification process to select bidders?		No
Are tariffs indexed (in part or in whole) to an international currency or to inflation?		
Are there provisions to ensure full and timely project completion (e.g. bid-bonds, project milestones)		No
Are projects awarded through auctions/bids online/on track to be online on stated date?		
Have auctions/bids met stated target for installations?		
Can small producers (residential, commercial rooftop PV,etc ) connect to the grid?		No
Are contracts with fixed tariffs available for such producers?		No
Is there a schedule or clear rules (e.g. capacity based limits) for adjusting the tariff level over time?		No
Are different tariffs available for different technologies and sizes of the generation plant?		No
Is there a mechanism to control the capacity built under each tariff?		
Are tariffs indexed (in part or in whole) to an international currency or to inflation?		

Network connection and use	Score	13

## Regulatory Indicators for Sustainable Energy (RISE)

Does the country have a grid code that clearly specifies connection procedures?	Yes
Do the connection procedures meet international best practices?	Yes
Does the grid code include measures or standards addressing variable renewable energy?	No
Are there rules defining the allocation of connection costs?	No
Is the type of the connection cost allocation policy considered shallow (grid operator pays for connection costs)?	
Are there rules that allow electricity customers to purchase power directly from a third party (i.e. an entity other than the designated utility in a service area)?	No
Do the rules define the size and allocation of costs for use of the transmission and distribution system (e.g. wheeling charges, locational pricing)?	No
Does the country carry out regular assessments of the flexibility of the electricity grid and the issues relating to renewables integration?	No
Can renewable energy projects sell into balancing/ancillary services?	No
Are there rules for exchanging power between balancing areas that penalize variable renewable energy, e.g. through imbalance penalties? (only scored in countries with multiple balancing areas)	No
Are there provisions in the power exchange rules that allow for plant forecasting? (only scored in countries with multiple balancing areas)	No
Does the country integrate high quality forecasting for any variable RE resources (either through subscription service or provided by national agencies) into their dispatch operations?	No
Are dispatch operations being carried out in real time?	No

## Regulatory Indicators for Sustainable Energy (RISE)

Counterparty risk	Score	8
Are the following financial ratios of the counterparty deemed creditworthy?		-
Current ratio		No
EBITDA margin		No
Debt service coverage ratio		No
Days payable outstanding		No
Is the counterparty underwritten by a government guarantee or are there other mechanisms to ensure credit worthiness (e.g. through a letter of credit, escrow account, payment guarantee, or other)?		No
Are standard PPAs bankable?		No
Are the financial statements of the largest utility publicly available in the following categories?		-
Generation		No
Transmission		No
Distribution		No
Retail sales		No
If yes, are they audited by an independent auditor for the following categories of utilities?		-
Generation		No
Transmission		No
Distribution		No
Retail sales		No

## Regulatory Indicators for Sustainable Energy (RISE)

Are the following metrics published in a primary official document (by the utility, regulator or ministry and/or government)?	-
Generation - Electricity available for sale to end-users	No
Transmission - Transmission loss rate	No
Distribution - Distribution loss rate	No
Retail Sales – Bill collection rate	No
Is the utility operating an incidence/outage recording system (or SCADA/EMS with such functionality)?	Yes
Is the utility measuring the SAIDI and SAIFI or any other measurements for service reliability?	No
Are the measurements reported to the regulatory body?	No
Are the measurements available to public?	No
