RISE scores (out of 100) per pillar 2021

ENERGY EFFICIENCY

- Legal framework for renewable energy
- Carbon pricing and monitoring
- Energy labeling systems
- Building energy codes
- National energy efficiency planning
- Incentives and mandates: energy utility programs
- Energy efficiency units
- Incentives and mandates: public sector
- Financing mechanisms for energy efficiency
- Minimum energy performance standards
- Incentives and regulatory support for renewable energy
- Planning for renewable energy expansion
- Counterparty risk
- Network connection and pricing
- Attributes of financial and regulatory incentives

RENEWABLE ENERGY

- Renewable energy: 0% of Total Final Energy Consumption
- Planning for renewable energy expansion
- Incentives and regulatory support for renewable energy
- Network connection and pricing
- Attributes of financial and regulatory incentives
- Carbon pricing and monitoring
- Legal framework for renewable energy
- Energy efficiency: 5.32 MJ per US$ PPP 2017

EVOLUTION OF RISE SCORE SINCE 2010

Note: The overall country score is based on the average score of Electricity Access, Energy Efficiency and Renewable Energy indicators.
